

### Galaxy Basket Hints:

1. The first piece to be inserted is the biggest piece
2. Assemble the pieces into a 3x3x3 cube outside the basket, making sure the planet is facing on top.
3. The first piece to be inserted into the basket is the biggest piece. It will rotate “around” the handle.
4. The piece that looks like an “S” goes in second. This piece is much harder to put in than the others, requiring a challenging rotation.
5. The biggest piece will have to move up and down in order to insert the “S” piece and one of the 3-unit pieces.
